Paragraph #60 Session #17 (2018)

Full Text

The Permanent Forum reiterates its concern over environmental violence, in particular the pervasive impacts of such violence on indigenous women and girls. The Forum takes note with appreciation of the recommendations from the third International Indigenous Women's Symposium on Environment and Reproductive Health, held at Columbia University in New York on 14 and 15 April 2018. The Forum recommends that members of the Inter-Agency Support Group on Indigenous Peoples' Issues and the relevant special procedures of the Human Rights Council consider ways to address and incorporate the recommendations from that Symposium.

Area of Work

Environment, Indigenous Women and Girls
